NEW LEVELS OF COLOR

LANDSCAPE & GARDEN COLOR GUIDE 2009-2010

ARE YOUR LANDSCAPES PROVEN WINNERS®?

You carefully sharpen your mower blades and pruning equipment. You walk greenhouses and nurseries to hand-select the perfect trees, shrubs, and blooming plants for your landscaping projects. You measure twice, and then take the time necessary to pick just the right materials for a patio. You spend even more time re-arranging and laying out the stone for a perfect, level fit. You take enormous pride in your work. Therefore, you shouldn't choose just any flowers.

Everyone knows the Proven Winners® name – The #1 Plant Brand® in North America. Proven Winners® is comprised of some of the world's best propagators who are dedicated to developing new hybrid varieties of plants with outstanding performance for growers, landscapers, and consumers. This elite group selects the most exciting new hybrid color and foliage varieties from around the globe which have been extensively trialed and tested in regions all over the world. Only the most colorful, fastest growing, versatile and vigorous plants are selected to bear the Proven Winners® label.

You can trust our commitment to quality, performance, and innovation in breeding. And because our plants are so healthy and vigorous, they provide a full season of reliable and low maintenance beauty. So don't settle for second best when selecting annuals and seasonal plant material for your colorful landscape beds and containers.

Make your landscapes Proven Winners®.

ADDING COLOR IS EASY...

If you have never used Proven Winners® before, start here with our best performing series and collections for landscapes.

DOUBLE IMPATIENS

Rockapulco® Series

Resembling mini roses, this series has bragging rights for the biggest, brightest, and most abundant flowers on a Double Impatiens. Take your shady landscape plantings to the next level.

LANTANA

Turn up the heat and humidity for an unbeatable mass display of flower power with Lantanas. These long season bloomers do not require deadheading.

NEW GUINEA IMPATIENS

Infinity® Series

New Guinea Impatiens are excellent border and container plants for shady areas. These large-flowered plants do not require deadheading.

GERANIUM

Caliente® Series

This new series of Ivy/Zonal cross Geraniums are easy to grow prolific bloomers in fantastic colors.

PETUNIA

Supertunia® Series

These heat tolerant, self-branching, self-cleaning Petunias are heavy bloomers and have outstanding performance in the landscape or in containers. Deadheading is not necessary.

GERANIUM

Calliope™ Series

Stunning in containers, hanging baskets, or landscape beds, these Geraniums bloom in sun or part shade.

PHLOX

Intensia® Series

The Intensia® series of Phlox perform beautifully all summer in the landscape under a wide variety of temperatures and conditions.

GERANIUM

Daredevil™ Series

Extra large flower heads make this series of traditional Geraniums a stand-out in landscape plantings.

VERBENA

Vigorous growth and stunning colors make heat and drought tolerant Superbena® and Lanai® Verbenas reliable low maintenance landscape performers.

Red is a strong color and stands out in the landscape. Use red to grab attention - it is a natural color choice for focal points. A little bit of red goes a long way. Small doses can often be more effective than large amounts of this stimulating color.

Blues can be intense or calming. Throw in a dash of blue to cool down a hot red or orange theme. Create attention with the contrast of blue and yellow. Dark blue with white is fresh and crisp. Red, white, and blue is, of course, the patriotic color trio.

Because purple is derived from the mixing of a strong warm color (red) and a strong cool color (blue), it has both warm and cool properties. Use redder purples for a richer, more robust color scheme or bluer purples for a more relaxing appearance.

White provides a clean look and mixes well with any color. Used with light or pastel tones, white is soft and spring-like and helps to make the pastel palette more lively. White can make reds, blues, and greens look brighter and more prominent.

Henry Ford Medical Center,
D&B Landscaping Inc., Livonia, Michigan

City of Monroe, Michigan

Abundant in nature, green signifies growth and renewal. With both a warming and cooling effect, the color green provides balance, harmony, and stability to the landscape environment. Use several shades of green for a fresh, springtime feel.

PENNISETUM Red Riding Hood
Dwarf Purple Fountain (Graceful Grasses™)
18-30" Height • 12-20" Spacing • Vigor 2

AWARD WINNER

ZONE 8

Fine, Green Foliage With
Wispy Tan Flower Spikes

SCIRPUS
Fiber Optic Grass (Graceful Grasses™)
10-14" Height • 10-12" Spacing • Vigor 2

ZONE 8

STIPA (NASELLA)
Mexican Feather Grass
12-18" Height • 24" Spacing • Vigor 2

Four Star offers a winning collection of top-performing perennial and annual grasses.

Ornamental grasses add texture, form, motion and sound to a garden, not to mention an array of colors. Our grasses will look good all season long with minimal care.

PLANT ESTIMATING CHART

Example: If you select 18" spacing and need to cover 300 square feet, the box where that column and row intersect tells you that you need 132 plants.

If you don't see your exact coverage area listed, either estimate by selecting the closest area listed or use the second chart (Spacing Multipliers) to precisely calculate how many plants you need.

TOTAL SQUARE FEET OF BED	Spacing - On Center							
	4"	6"	8"	10"	12"	18"	24"	36"
50	450	200	113	73	50	22	13	6
100	900	400	225	145	100	44	25	11
150	1350	600	338	218	150	66	38	17
200	1800	800	450	290	200	88	50	22
250	2250	1000	563	362	250	110	63	28
300	2700	1200	675	435	300	132	75	33
400	3600	1600	900	580	400	176	100	44
500	4500	2000	1125	725	500	220	125	55
600	5400	2400	1350	870	600	264	150	66
700	6300	2800	1575	1015	700	308	175	77
800	7200	3200	1800	1160	800	352	200	88
900	8100	3600	2025	1305	900	396	225	99
1000	9000	4000	2250	1450	1000	440	250	110

This chart is meant to be used as a guideline, site variables may affect exact quantities needed.

SPACING MULTIPLIERS

You can use the following formula to calculate how many plants you will need based on your 'Spacing Multiplier'.

Example: You want to cover an area of 120 sq. ft. with a spacing of 10". The spacing Multiplier for 10" spacing is 1.45. Multiply 1.45 x 120 sq. ft. = 174 plants needed.

SPACE BETWEEN PLANTS	SPACING MULTIPLIER (Plants per Square Foot)
4"	9
5"	5.76
6"	4
7"	2.94
8"	2.25
9"	1.78
10"	1.45

SPACE BETWEEN PLANTS	SPACING MULTIPLIER (Plants per Square Foot)
11"	1.19
12"	1
15"	0.64
18"	0.44
24"	0.25
30"	0.16
36"	0.11

Formulas For Figuring Square Feet:

Squares and Rectangles = Length x Width

Circles = 3.14 x Diameter

WHAT MAKES PROVEN WINNERS® BETTER ?

Proven Winners® plants have won more University performance trial awards throughout North America than any other plant brand. Proven Winners® works with plant breeders around the globe to bring you the most cutting edge and innovative plants for the landscape. Proven Winners® and Proven Selections® plants have award winning genetics for outstanding landscape performance, low maintenance, and disease resistance. Each plant begins its life in a laboratory to ensure it is free of viral contaminants and plant diseases. They are then trialed and tested at a number of strategically placed locations throughout North America to ensure landscape performance under any climatic condition.
