

DOLCE®

Heuchera hybrids

DOLCE® Key Lime Pie
Heuchera hybrid TINHEU042 USPP16735 Can2564

Bred and selected for production in pots as small as 4.25", Dolce varieties also finish in five to six weeks. Vigorous and cold-hardy, their unique colors deepen and intensify in cool weather. This is the first series of foliage plants with flowering variety glamour. Bred for greenhouse production, Dolce is the finest and most appealing foliage series on the market. All Dolces come with a Proven Winners Perennial tag.

Growing Tips:

They begin blooming in early spring. Deadheading won't keep them blooming longer. However,

removing the flower stems once the plant has finished blooming will keep them looking tidier.

Exposure: Sun to full shade

Height: 8-16"

Spacing: 10-20"

Hardy Temp: -25°F (-32°C)

Uses:

Plant alone or in combinations in all container types and landscapes.

Features:

Foliage can withstand extremely cold temperatures; has great year-round interest; flowers attract hummingbirds; deer resistant.

Growing Tips for DOLCE®

- For best foliage coloration, avoid scorching light.
- Needs 150-200 ppm fertilizer and light shade for optimal growth.
- Botrytis can be a problem under cold, wet, low-light conditions.

Additional Culture Information for DOLCE®

pH/EC: 5.5 - 6.2 / .6 - .9

Growing Temperature: 65-72°/65-72°

Holding Temperature: 40-50° outdoors

Water Requirements: Moderate to Moist

Planting and Timing: Early Spring through Fall Finish.
Standard Plants Per Pot.

Finish Times in Weeks: For 4-5", 4-6; for 6"/gallon, 5-7;
for 8", 7-9; for 10-12", 10-12

Spring Outdoor Finish: Do not finish outside

Notes:

No pinching or growth regulators needed.

Finished spring plants can be moved outside to take advantage of cool temperatures for holding purposes only.

During fall and winter months, biweekly copper sprays keep leaves spotless (bacteria sprays).

Monthly drench with Marathon II for mealybugs suggested.
