Growing Tips for LEMON DROP®

- Will exhibit red stem and leaf edges under cool temperatures.
- Yellowing foliage is most likely a symptom of overwatering.
- Long days are needed to flower early. Under natural day length, the plants will generally bloom beginning in late spring.
- A physiological response to cold temperatures is pink spots on the foliage, which disappears as temperatures rise in production later in the season.

Additional Culture Information for LEMON DROP®

pH/EC:	5.8 - 6.2 / .6 - .9
Growing Temperature:	65-72°/55-65°
Holding Temperature:	40-50° outdoors
Water Requirements:	Moderate to Moist
Planting and Timing:	Late Spring through Fall Finish. Standard Plants Per Pot.
Finish Times in Weeks:	For 4-5", 4-6; for 6"/gallon, 5-7; for 8", 7-9; for 10-12", 10-12
Spring Outdoor Finish:	First to go outside

Notes:

For pots 6" and smaller, pinch at transplanting only.
For hanging baskets and pots larger than 6", soft pinch at planting and additional shaping pinch as needed.
PGRs generally not needed, but 5-10 ppm of Sumagic® is effective. Winter flowering occurs in Sunbelt states.
