

# ROCKAPULCO®

*Impatiens walleriana*

ROCKAPULCO® Orchid  
*Impatiens walleriana* "Lavendar Orchid" USPP9615

Rockapulco varieties feature unbeatable performance, plus the biggest, brightest, and most abundant flowers you'll find in Double Impatiens. Rockapulco varieties have excellent branching, uniformity, and a full range of color options, making them an ideal choice for premium containers.

**Growing Tips:**

Deadheading isn't necessary, but cleaning off spent blooms won't harm it.

**Exposure:** Partial shade or shade

**Height:** 10-20"

**Spacing:** 10-12"

**Hardy Temp:** 35°F (2°C)

**Uses:**

Use in landscapes, containers, and combinations.

**Features:**

Light up any shady area with masses of blooms that resemble miniature rosebuds; no deadheading required; blooms spring to frost.

**Growing Tips for ROCKAPULCO®**

- Needs 200 ppm fertilizer for optimal growth.
- Avoid high ammonium and phosphorous fertilizers and do not overwater.
- Requires moderate light intensity for optimal growth. Reduce light intensity when temperatures are high to prevent flower and leaf burning as well as bud drop.
- Apply Bonzi® (3-10 ppm) once or twice to control growth. Higher rates may be necessary in Southern production areas.
- Moderate drying of media will enhance flowering and control stretch. Too much drying can cause leaf scorch under high light.
- Leach periodically to keep salt levels in pot low.

**Additional Culture Information for ROCKAPULCO®**

pH/EC: 5.8 - 6.2/ .75 - .80  
 Growing Temperature: 68-74°/65-75°  
 Holding Temperature: 50-60° outdoors  
 Water Requirements: Moderate to Moist  
 Planting and Timing: Early Spring through Fall Finish. Standard Plants Per Pot.  
 Finish Times in Weeks: For 4-5", 6-9; for 6"/gallon, 7-9; for 8", 7-9; for 10-12", 10-12  
 Spring Outdoor Finish: Do not finish outside

**Notes:**

No pinching needed. Watch for thrips.  
 Watch for Botrytis - deadheading is necessary before shipping.

**Award Winner:**

**23 Awards**
