

SIMPLY SCENTSATIONAL™

Heliotropium hybrid

SIMPLY SCENTSATIONAL™ *Heliotropium hybrid* USHTRP0303 USPPAF CanPBRAF

For gardeners who love Lantana but wish it smelled better, Simply Scentsational Heliotrope is the answer. It combines all the drought and salt tolerance of Lantana with a sweet fragrance and season-long durability. Bred from native American wildflower genetics, this breakthrough plant tolerates poor soils, hot sun, humid summers, and never stops providing a cloud of pale lavender blooms.

Growing Tips:

Pinching plants will encourage branching. This plant can be toxic, do not ingest any part of the plant.

Exposure: Full sun

Height: 24-30"

Spacing: 10-14"

Hardy Temp: 20°F (-7°C)

Uses:

Great in both landscapes and containers.

Features:

This type of Heliotrope is known for its soft fragrance. Salt tolerant.

Growing Tips for SIMPLY SCENTSATIONAL™

- Requires high light for production.
- Needs 150-200 ppm fertilizer for optimal growth.
- Pinch once, two weeks after liner planting.
- Best suited for large pot production and landscape planting.
- This plant can be toxic. Do not ingest any parts of this plant.

Additional Culture Information for SIMPLY SCENTSATIONAL™

pH/EC: 6 - 6.5/6 - .9

Growing Temperature: 65-72°F/65-72°F

Holding Temperature: 50-60°F outdoors

Water Requirements: Moderate to Moist

Planting and Timing: Spring through Summer Finish. Standard Plants Per Pot.

Finish Time in Weeks: For 4-5", 4-6; for 6"/Gallon, 6-8; for 8", 8-10; for 10-12", 10-12

Spring Outdoor Finish: Last to go outside

Notes:

B-9 at 2,500 ppm or Sumagic® at 5 to 10 ppm will help control growth if necessary.

A preventative fungicide drench at planting will be helpful. In poor weather conditions, avoid wet soil and moisture on the foliage.

Avoid dry downs because plant reacts with leaf drops.

Watch for white flies - preventive treatment with Tristar, Marathon II.
