

# SLIGHTLY STRAWBERRY™

*Anisodontea hybrid*

SLIGHTLY STRAWBERRY™  
*Anisodontea hybrid* 'Nuanlaing' USPPAF Can/PBR/AF

This drought-tolerant annual shrub features deep pink Hibiscus-like flowers and silver green foliage. A vigorous grower, Slightly Strawberry likes even moisture but doesn't need lots of fertilizer. Blooms best in cool nights. Great in the landscape or as a centerpiece in mixed containers.

**Growing Tips:**

Self-cleaning, no deadheading necessary.

**Exposure:** Full sun

**Height:** 24-36"

**Spacing:** 12-18"

**Hardy Temp:** 25°F (-4°C)

**Uses:**

Great in landscapes and containers. Cape Mallow is native to South Africa and prefers somewhat cooler temperatures. It will suffer when it is hot and humid. This is especially true when night temperatures begin staying in the 70's or higher.
